

Dr. Ir. Andries van Renssen

Principal Consultant Information Management

Shell Global Solutions

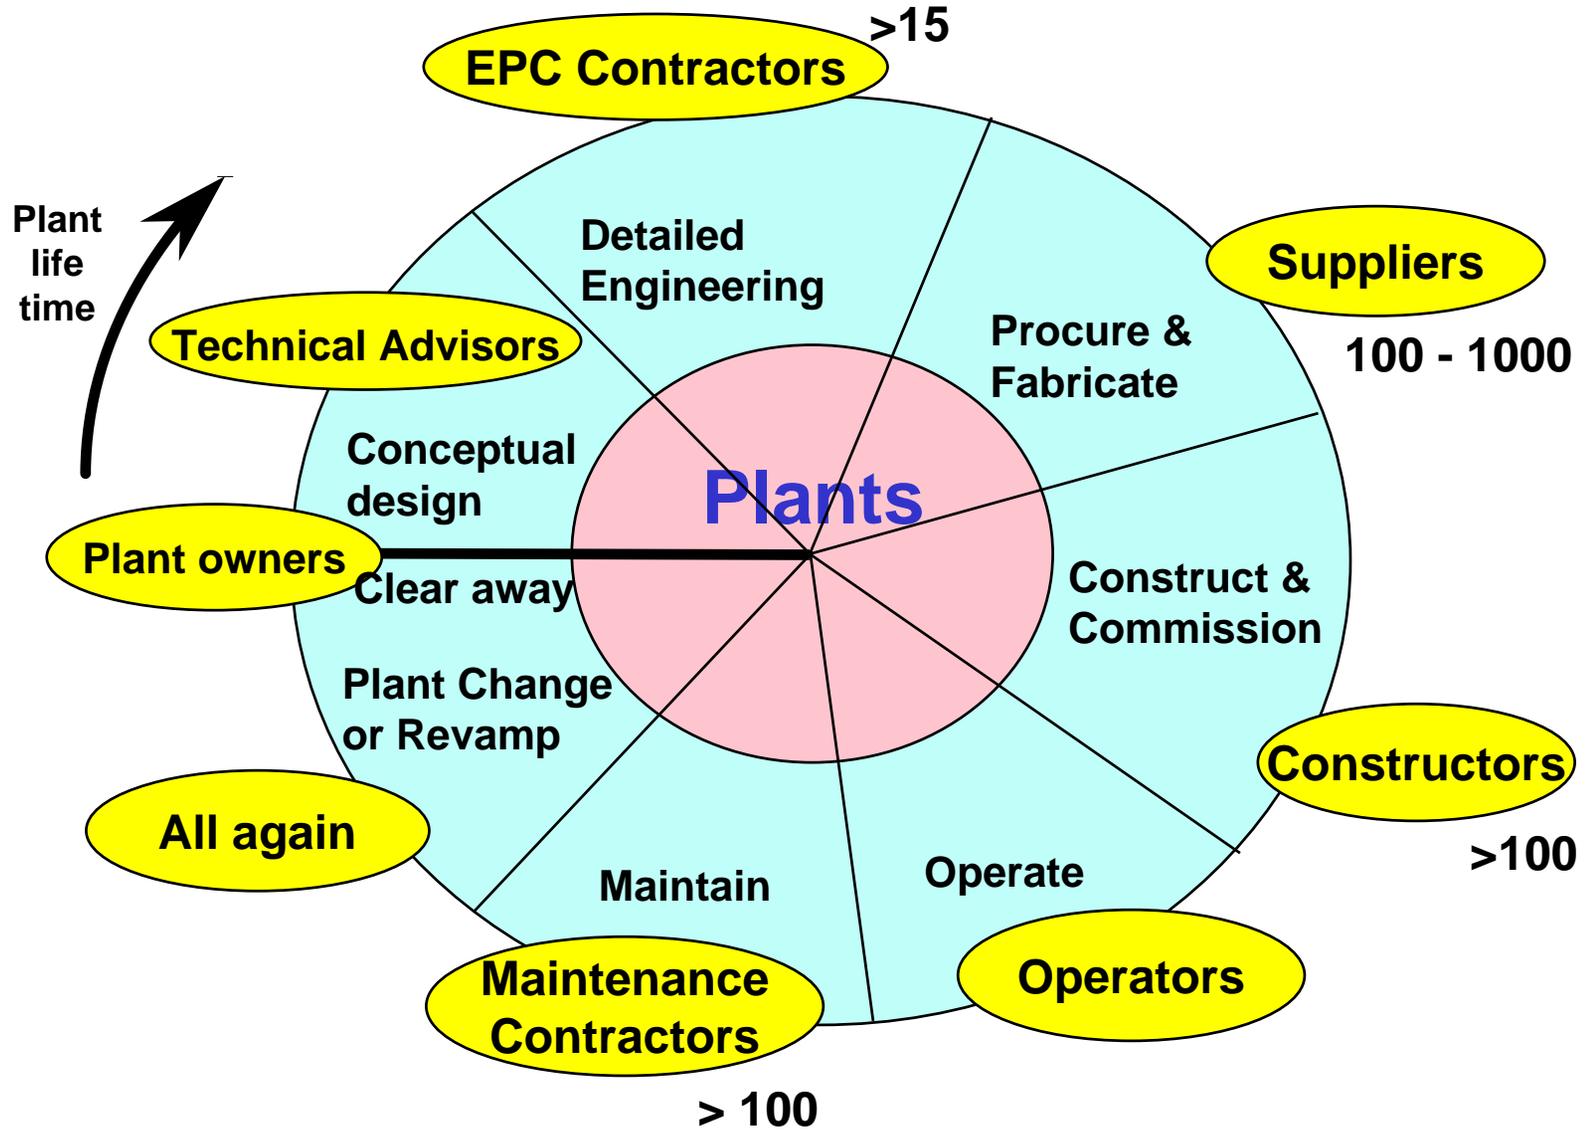

**Consultancy & Services
for
Data Exchange and Data Integration**

The Gellish Language

a structured subset of natural languages

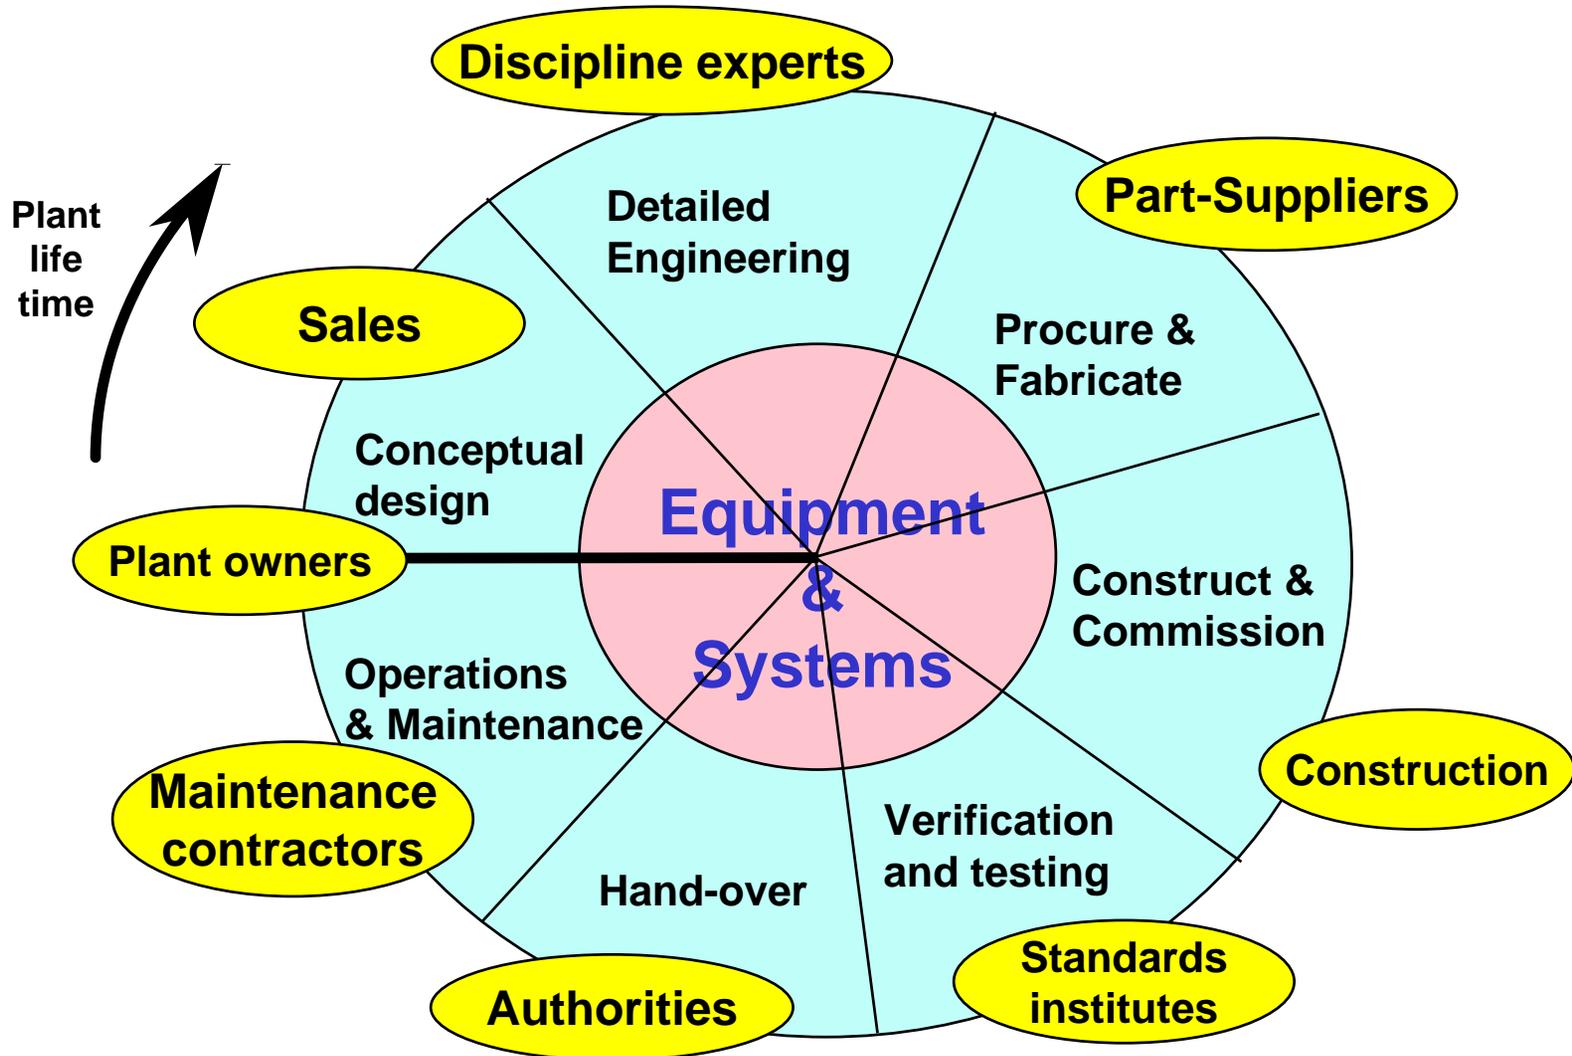

- Gellish English**
- Gellish Nederlands**
- Gellish Deutsch**
- Etc.**
- Gellish numeric**

The Business Issue: Communication on Product Data

The Business Issue: Communication on Product Data

Suppliers perspective

The Data Exchange & Data Integration issue

- 1. Standard engineering terminology is needed**
 - There is no standard electronic Business/Engineering dictionary available
Ecl@ss, Rosettanet, Trade Ranger, UNSPSC, ..., STEPlib / ISO 15926-4
All proprietary data and based on proprietary data models

- 2. Data structures are problematic**
 - Data models are different and proprietary: communication barriers
 - Data models are domain specific: e.g. ISO 10303 (STEP), ISO 13584 (PLIB)
 - Data models are inflexible, fixed patterns rather than a full language

- 3. Generic standard data models are difficult to implement**
 - E.g. ISO 10303-221 (AP221), ISO 15926-2

- 4. XML does not provide standardization of application data**
 - Neither data modeling languages nor data models define application terms
 - E.g. UML, XML-schema, EXPRESS

The Gellish Language as a solution

1. Open Source language definition

- Open Source Licensed

<http://www.opensource.org/docs/definition.php>

- <https://sourceforge.net/projects/gellish>

contains the Gellish English language definition

with Dictionary / Taxonomy / Knowledge base with engineering terminology

2. Gellish Forum

- Quality assurance
- Application support

3. Based on and including concepts from

- ISO 10303, 15926, 13584, 12006.
- IEC 60050, ISO 31, ISO 1000, ISO 1131-3, ISO 1998
and various other sources.

An individual Plant Model

Legend

-  is part of
-  is input/output/subject/performer/hold up in
-  is connected to

Meta languages

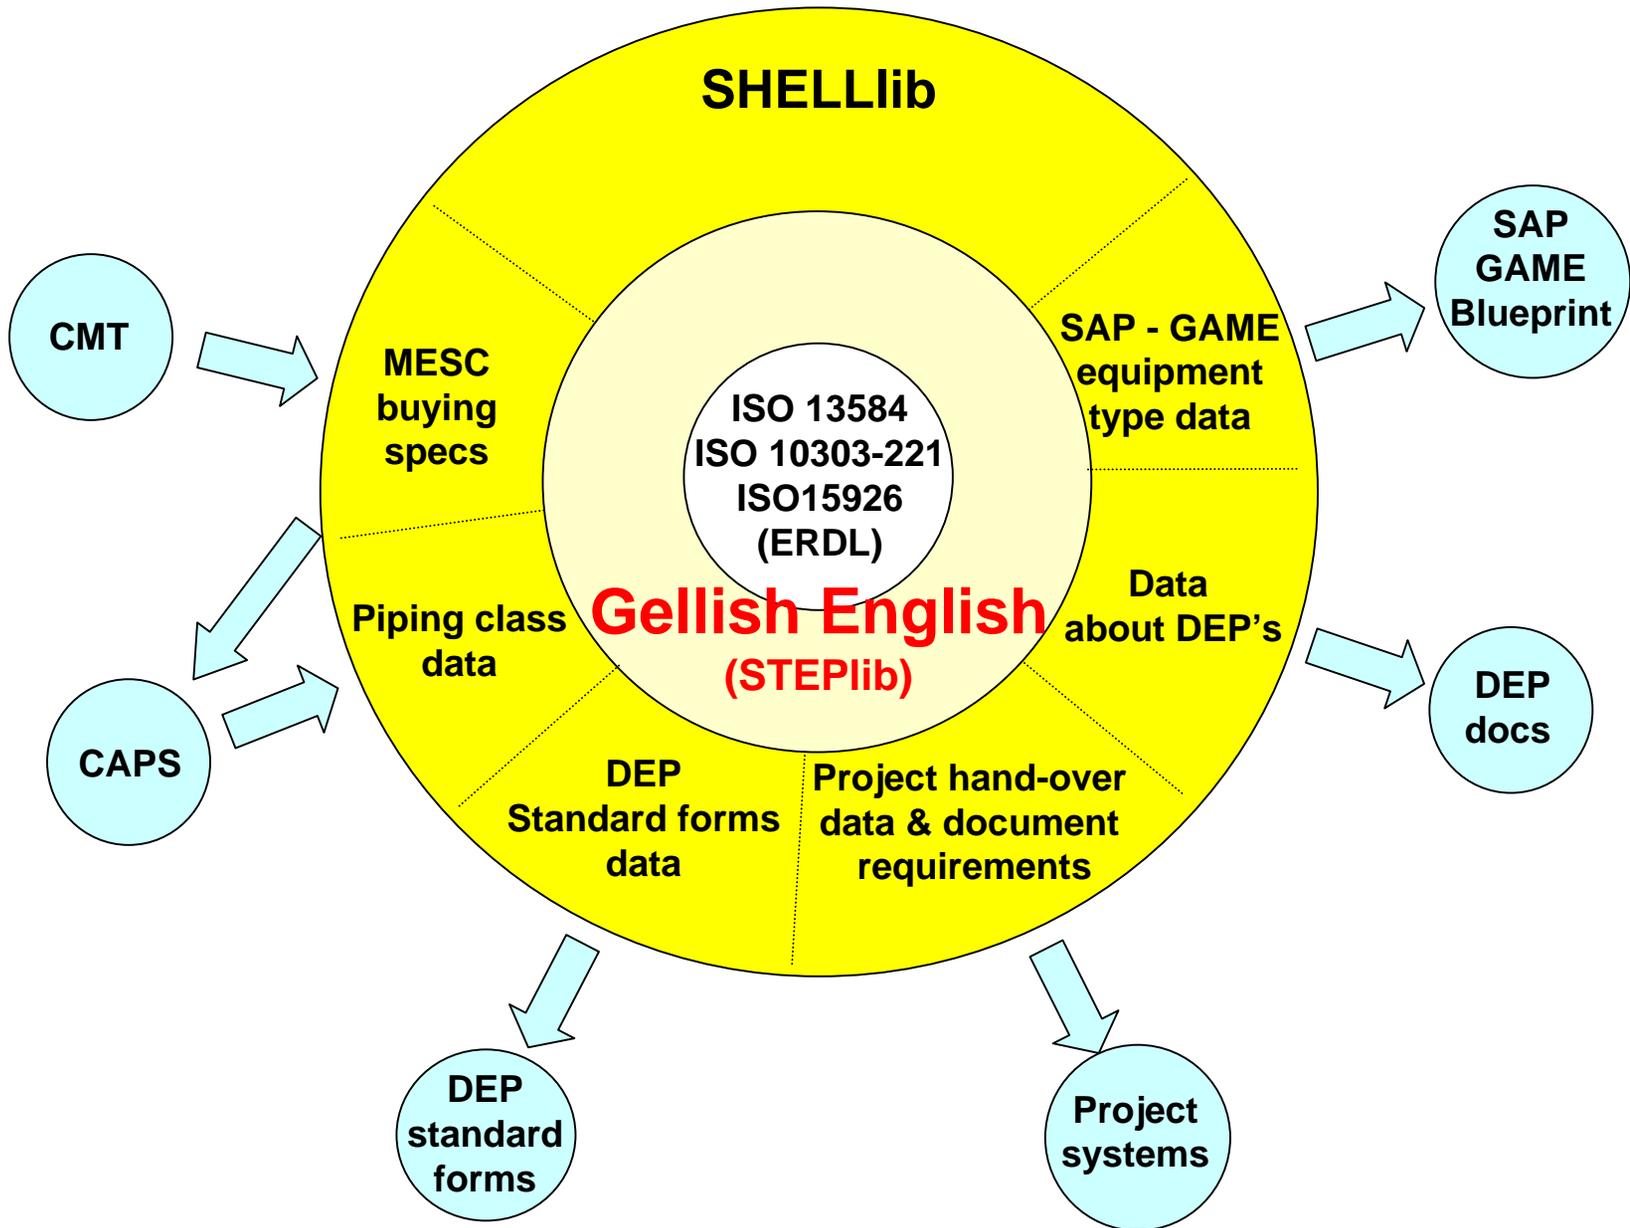

Standard Product models & Knowledge models expressed in Gellish English

Relate your Company Dictionary to ISO standards

Top view: SHELLlib and ISO standards

The Gellish language

Gellish Language definition: Dictionary / Taxonomy

- Object types, incl. document types, activity types, etc.
- Aspect types,
- Relation types
 - Relations between concepts
 - Relations between individual objects
 - Relations between individual objects and concepts

Language usage: Gellish Table (syntax)

Left hand object	Relation type	Right hand object	UoM
K-1301	is part of	U-1300	
K-1301	is classified as a	compressor	
K-1301	has as aspect	capacity of K-1301	
capacity of K-1301	is classified as a	capacity (mass flow rate)	
capacity of K-1301	is quantified as	46	kg/s

Language usage: STEPlib Knowledge base:

Left hand object	Relation type	Right hand object
compressor	can have as aspect a	capacity (mass flow rate)
	is part of	relation between individuals

Private extensions of the Gellish language

Requirements

e.g. Hand-over requirements

Left hand object	Relation type	Right hand object
compressor	shall have as aspect a	capacity (mass flow rate)
equipment	shall be part of a	system
equipment	shall be element of a	maintenance unit

- Company Standards e.g. Standard product models
Mappings to/from system e.g. SAP
Standard Buying descriptions (e.g. MESC)
Piping classes
- Catalogue items e.g. Vendor catalogues

E.g. Your company specific Private Extension

Knowledge expressed in Gellish

Subsets of Gellish Knowledge Base (STEPLib):

1. List of concepts with their names

English 70073 coriolis mass flow meter

English 70073 coriolis flow meter

2. Dictionary

English 70073 coriolis mass flow meter is a specialization of mass flow meter intended to apply the Coriolis principle to measure a mass flow rate.

3. Taxonomy

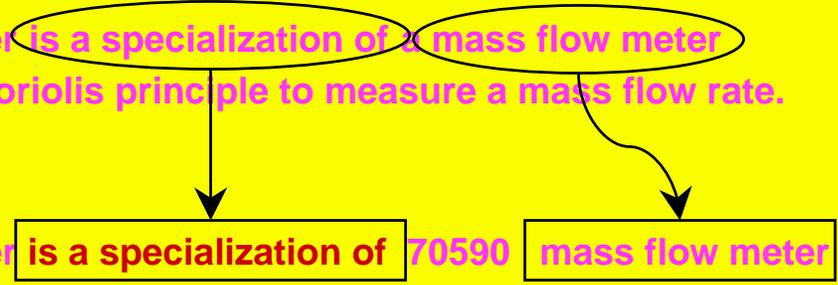

English 70073 coriolis mass flow meter is a specialization of 70590 mass flow meter

English 70590 mass flow meter is a specialization of 70143 flow meter

4. Ontology or Knowledge models ('smart dictionary')

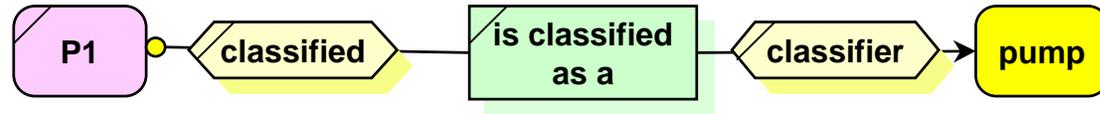

English 70143 flow meter can have as part a 10131 straightener

English 10131 straightener can have as aspect a 551353 length

Representation in a Gellish Table

A universal single table (summary)

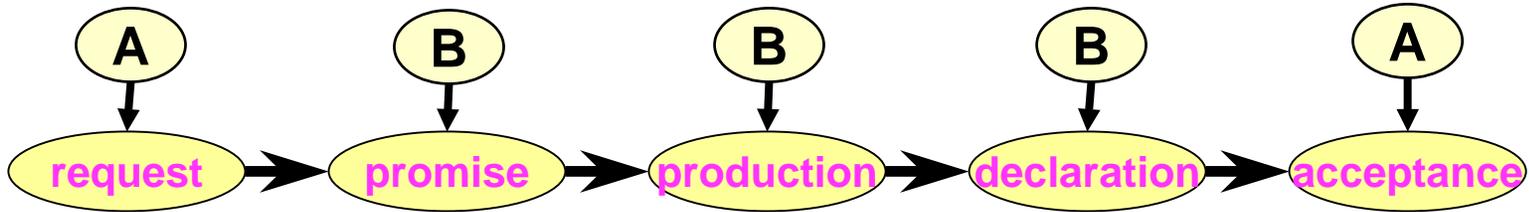

54	16	2	101	1	60	3	15	201	8
Language	Context	Left hand object ID	Left hand object name	Fact ID	Relation type ID	Relation type name	Right hand object ID	Right hand object name	Status
english	proj A	101	P-1	201	1225	is classified as a	130058	centrifugal pump	accepted

72	73
Left hand role ID	Left hand role name
501	classified P-1

74	75
Right hand role ID	Right hand role name
601	classifier centrifugal pump

Gellish Table

Knowledge model of a Business Process according to the 'DEMO' methodology

request	can precede a	promise
promise	can precede a	production act
production act	can precede a	declaration
declaration	can precede a	acceptance
person	can request to perform a	production act
person	can be requested to perform a	production act
person	can promise to perform a	production act
request	can result in a fact of type	A has requested to perform Xi
request	can result in a fact of type	B is requested to perform Xi
promise	can result in a fact of type	B has promised to perform Xi
production act	can result in a fact of type	B has produced Xr
production act	can have as output a	product

- blue text = Gellish standard relation type
- purple text = Gellish standard concept

Gellish Table

Knowledge model of a Vessel

520243	vessel	can be a part of a	160104	process unit
160177	material	can have as aspect a	550020	mass
550020	mass	can be expressed on scale	570039	kg
520243	vessel	can have as aspect a	550102	design pressure
550031	pressure	can be expressed on scale	570393	barga
520204	shell	can be a part of a	520243	vessel
520204	shell	can have as aspect a	550206	outside diameter
550188	diameter	can be expressed on scale	570423	mm

- blue text = Gellish standard relation type
- purple text = Gellish standard concept
- red text = Gellish standard unique identifiers

Gellish Table

Requirements model of a Vessel

520243 vessel	shall be a part of a	160104 process unit
520243 vessel	shall be classified as a subtype of	520243 vessel
520243 vessel	shall be described by a	910171 description
520243 vessel	shall be referenced on a	490040 construction drawing
490196 drawing	shall be classified as a subtype of	490196 drawing
520243 vessel	shall have as aspect a	550020 mass
550020 mass	shall be expressed on scale	570039 kg
520243 vessel	shall have as aspect a	550102 design pressure
550031 pressure	shall be expressed on scale	570393 barga
520243 vessel	shall be made of a	552856 material of construction
520243 vessel	shall be compliant with a	910174 design rule
520204 shell	shall be classified as a subtype of	520204 shell
520204 shell	shall be a part of a	520243 vessel
520204 shell	shall have as aspect a	550206 outside diameter
550188 diameter	shall be expressed on scale	570423 mm

- blue text = Gellish standard relation type
- purple text = Gellish standard concept
- red text = Gellish standard unique identifiers

Gellish Table

Product model of a Vessel

2	V-6060	is part of	1	Blow Down Unit 6050
2	V-6060	is classified as a	520121	horizontal vessel
2	V-6060	is described by	5	flare knock out drum
2	V-6060	is referenced on	4	FPS120/22/31 SRP
4	FSP120/22/31..	is classified as a	490040	construction drawing
2	V-6060	has as aspect	6	m of V-6060
6	m of V-6060	is classified as a	550020	mass
6	m of V-6060	is quantified as	924238	19000 570039 kg
2	V6060	has as aspect	7	dp of V-6060
7	dp of V-6060	is classified as a	550102	design pressure
7	dp of V-6060	is quantified as	920104	4 570393 barga
2	V-6060	is made of	280043	carbon steel
2	V-6060	shall be compliant with	8	R-550352
8	R-550352	is classified as a	910174	design rule
3	shell-1	is classified as a	520204	shell
3	shell-1	is part of	2	V-6060
3	shell-1	has as aspect	9	OD of shell-1
9	OD of shell-1	is classified as a	550206	outside diameter
9	OD of shell-1	is quantified as	10	4124 570423 mm

Example of standard Gellish English types of relations

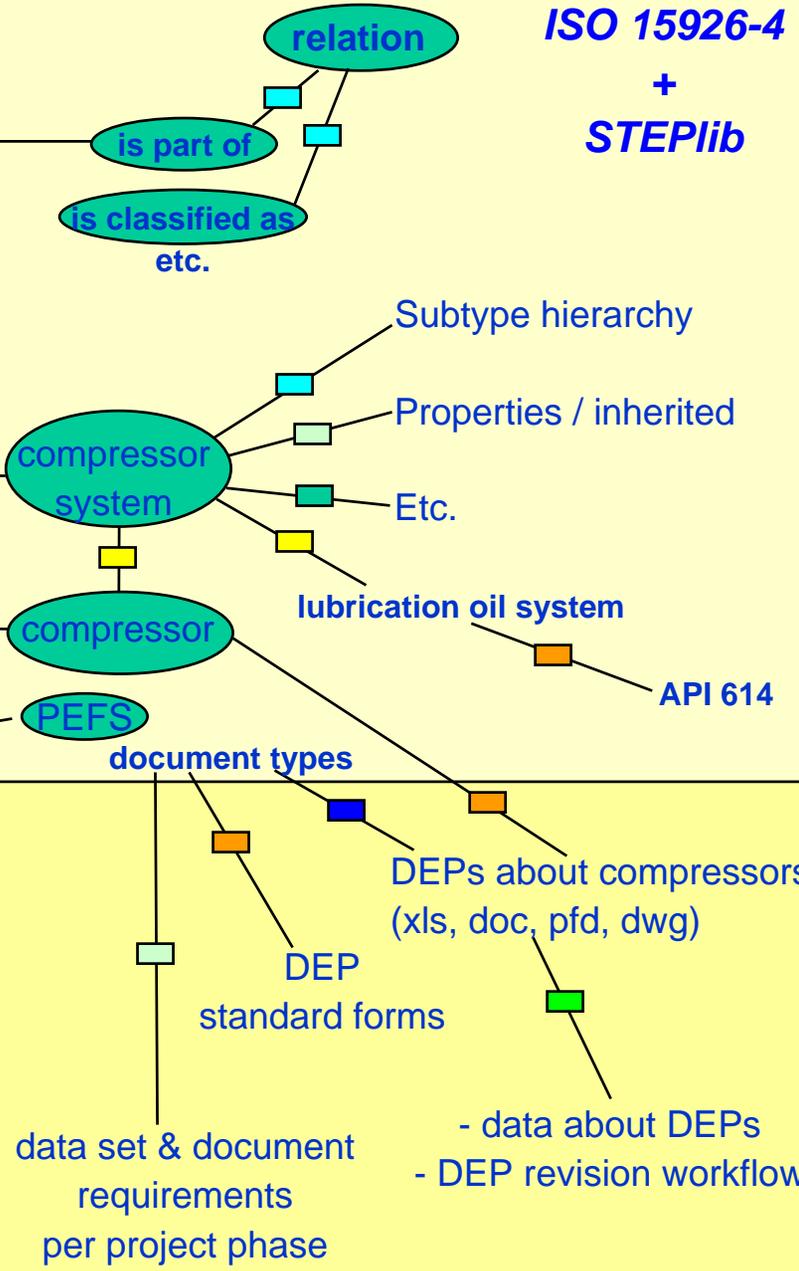

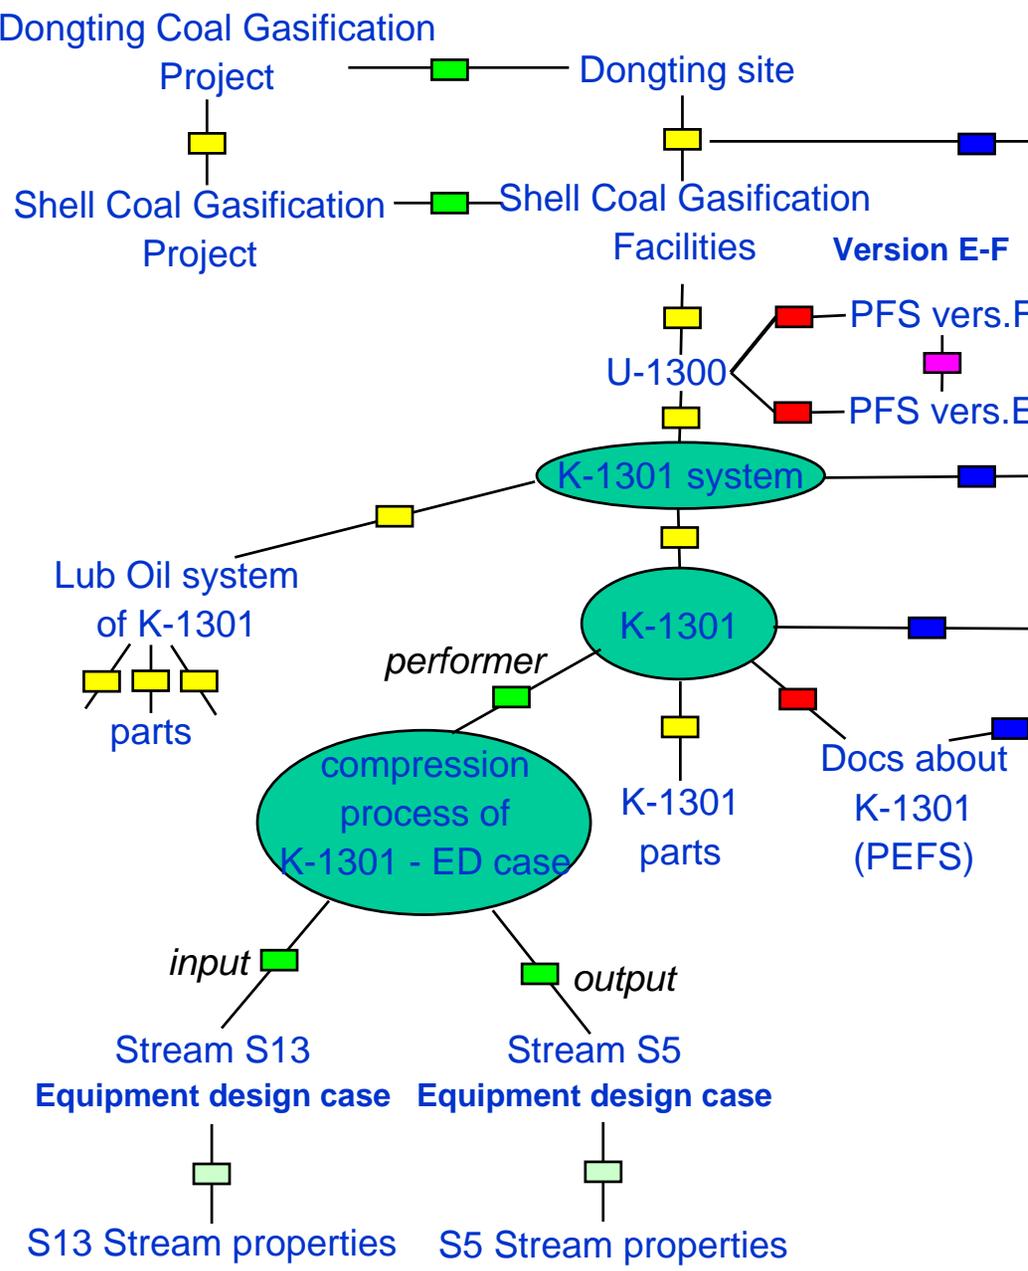

Examples for the expression of facts about Individuals

- ... is identified by ...
- ... is classified as ...
- ... is a part of ...
- ... has as property ...
- ... has as quality ...
- ... is described by ...
- ... is connected to ...
- ... is placed relative to ...
- ... is a version of ...
- ... is derived from ...
- ... is spare for ...
- ... is defined in/on ...
- ... is referenced in/on ...
- ... is made of ...
- ... is approved for ...
- ... is created / terminated at ..
- ... is valid since / until ...
- ... is involved in ...
- ... is owned by ...
- ... is operated by ...
- ... is maintained by ...
- ... happened at ...
- ... is cause of ...
- ... is included in ...
- ... is required as input for /
as output for ...
- ... is presented by ...
- ... is carrier of ...
- ... is a realisation of ...

Plant Data & Documents

Knowledge Data & Documents

ISO 15926-4
+
STEPIlib

SHELLlib / DEPs

Demonstration topics

1. Plant objects have classifications K-1301
2. Classes have 'knowledge models', hierarchy, inheritance of aspects compressor knowledge
3. Classes relate to DEPs and/or external standards DEPs on compressors
4. Equipment 'shall be compliant to' a DEP, because of its classification View DEP on compressors
5. Generate and fill-in a 'data sheet view' based on a knowledge model Create compressor K-1302
6. Generate a 'summary sheet view' of objects of a type, with/without subtypes List of compressors
7. Asset breakdown Dongting site / browser
8. Project breakdown related to Asset breakdown and Organizations Shell CGF project
9. View documents about process units (PFS, PEFS), incl. versions U-1300 > T-..v E, view F
10. Equipment is related as performer to process K-1301 > gas compression
11. Processes operate on input / output streams gas compression > S5, S13
12. Stream data form a material balance S5 properties, S13 props
13. Stream data is not duplicated when shown as process data for equipment K-1301 properties
